

Tubular Drag Conveyor

Innovative **ideas** move material **continuously** in **any direction** with **minimal wear for years**

Prevents product degradation. The gentle-handling conveyor greatly reduces, if not eliminates, material segregation and degradation.

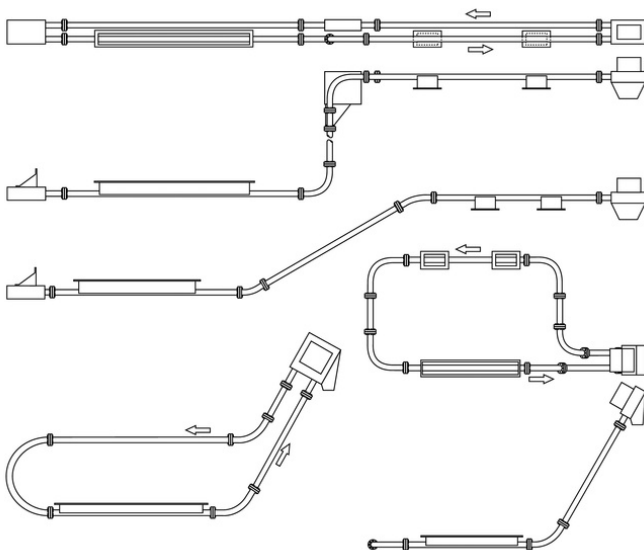

Replaces several conveyors. The flexibility in layouts allows you to convey horizontally, vertically, at an angle and around corners— with one conveyor. Eliminates the need for multiple conveyors.

Operates dust-free. The completely sealed system keeps the material where it belongs, eliminating toxic or flammable spillage, odors and airborne dust that create hazardous work areas.

Discharges 100% of material. Our exclusive self-cleaning discharge gate swings completely open, providing 100% discharge—no trapped material.

Starts under load. Unlike cable conveyors, our tubular conveyor uses a heavy-duty chain. This allows for starting and stopping under load day in and day out. No frayed or broken cables to cause product rejections or maintenance headaches.
